

(a)

E1 dominant environmental variable

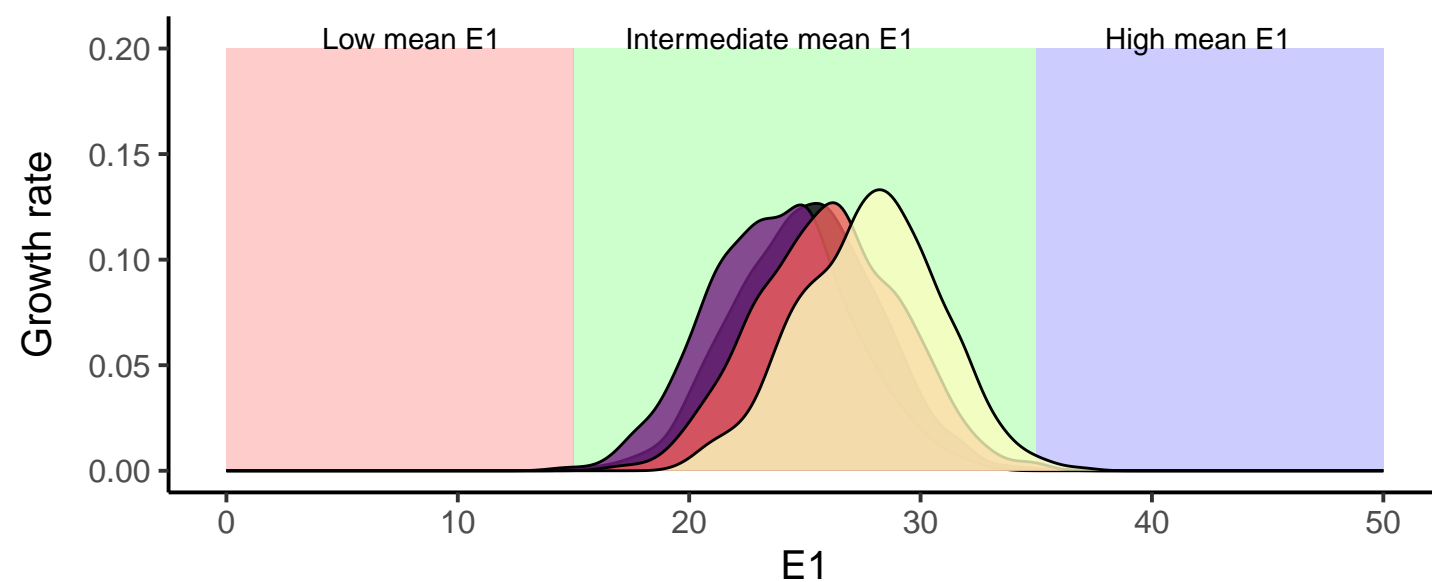

Equal effect of E1 and E2

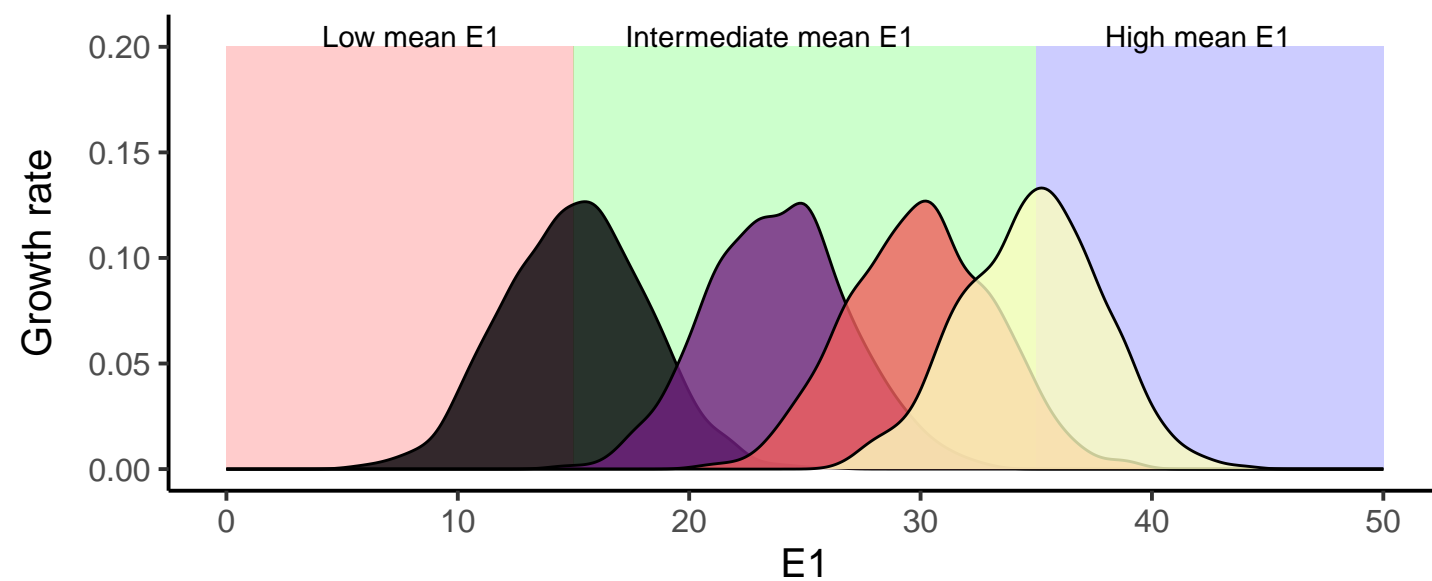

(b)

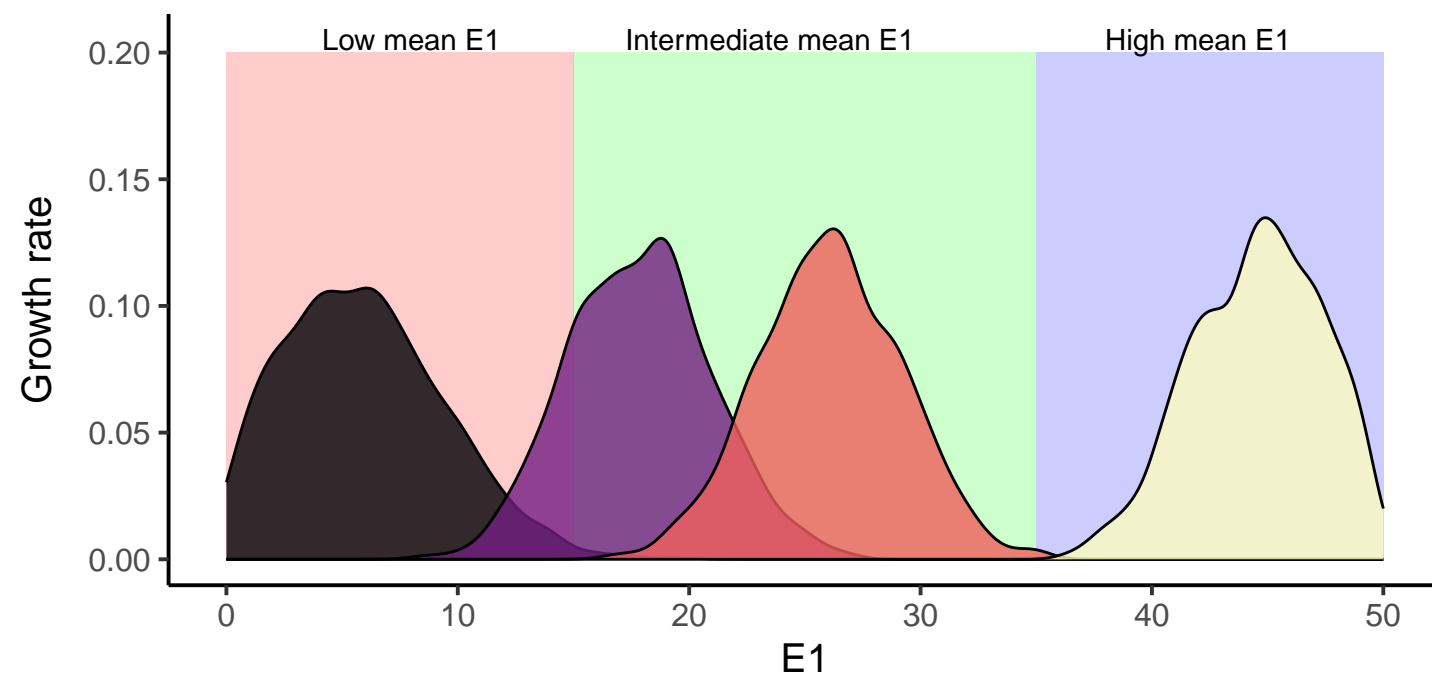

Low interspecific diversity in E1 optima

Medium interspecific diversity in E1 optima

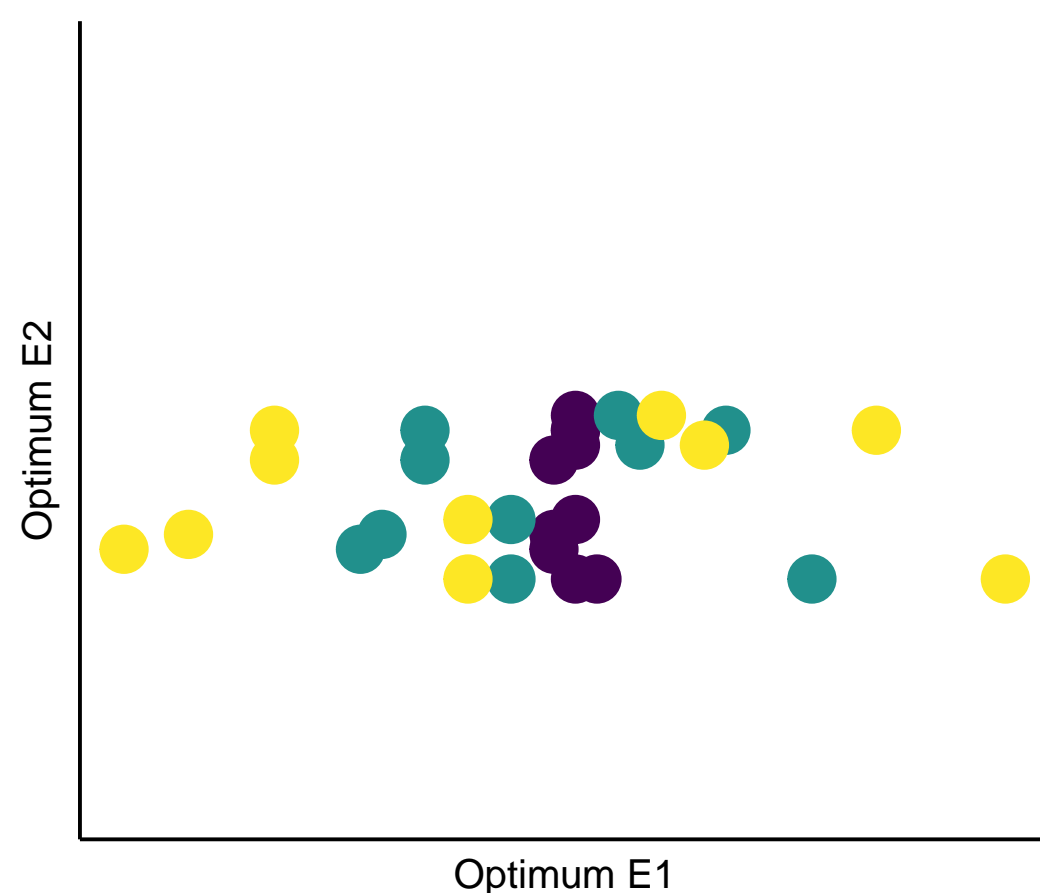

High interspecific diversity in E1 optima

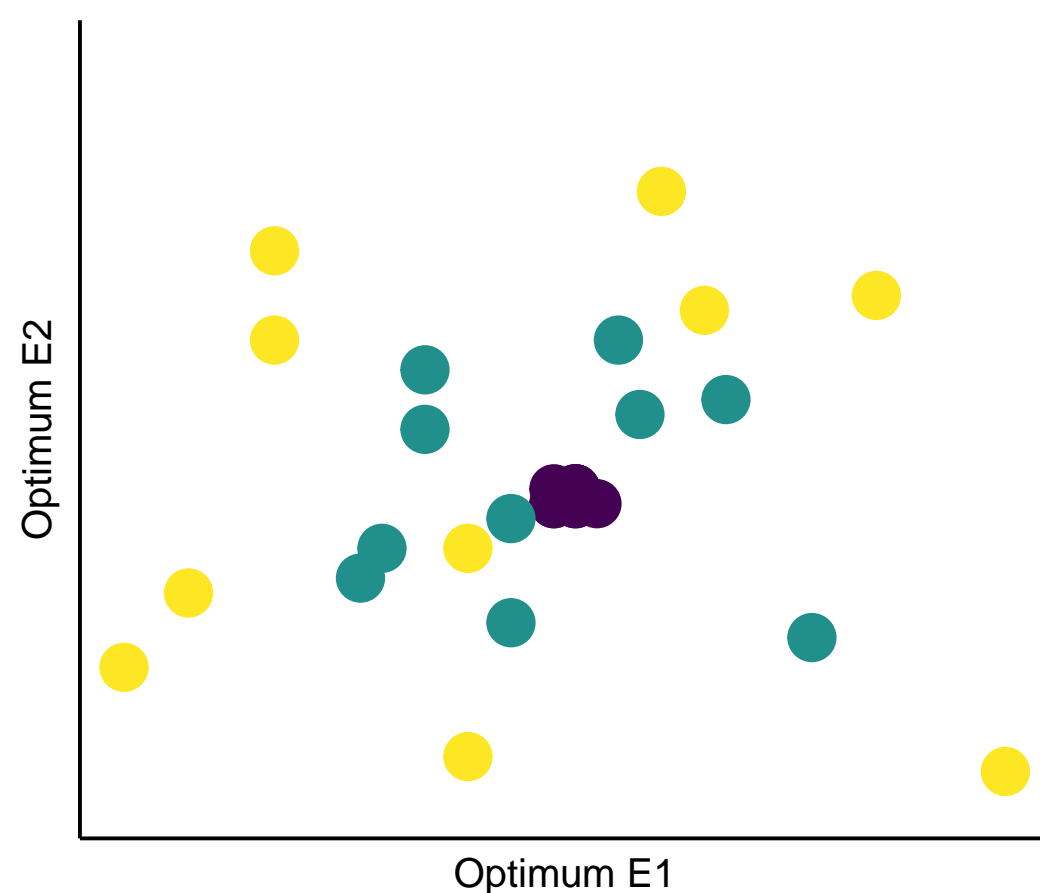

species Sp 1 Sp 2 Sp 3 Sp 4

(c)

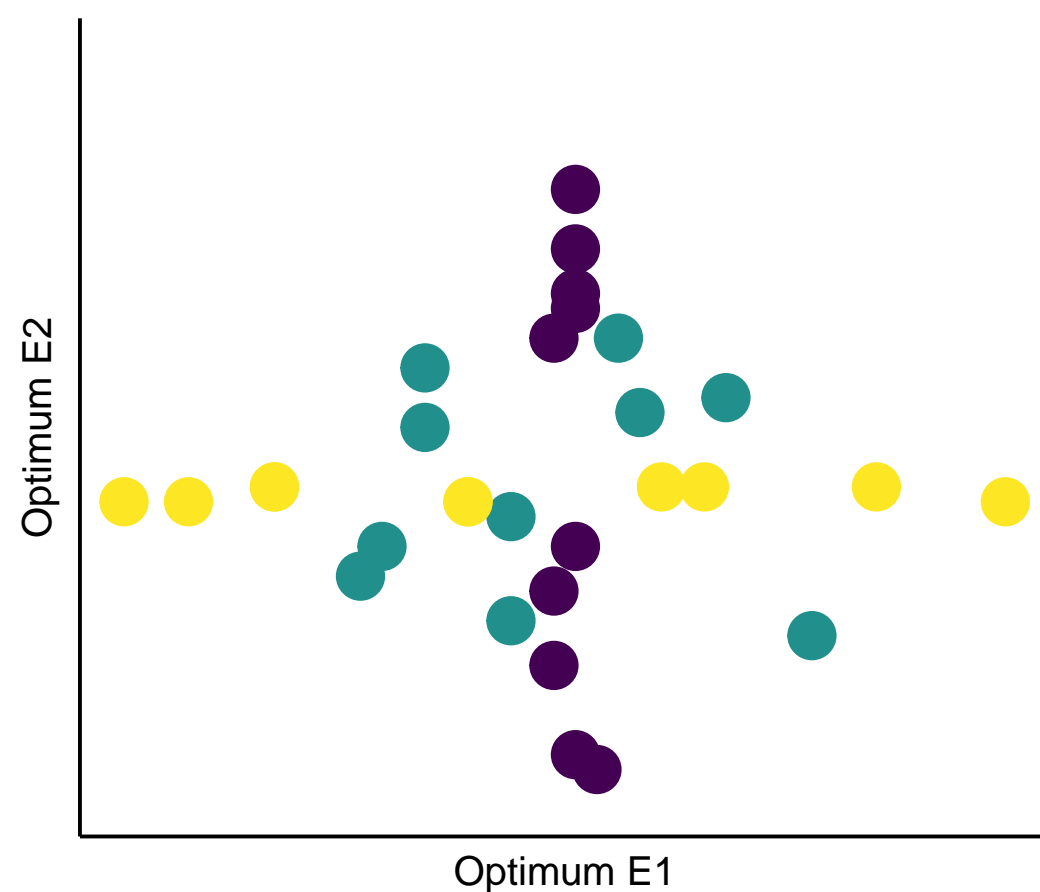

Communities vary in only the amount of interspecific diversity in E1 optima – No correlation

Communities vary in both the amount of interspecific diversity in E1 and E2 optima – Positive correlation

Communities vary in both the amount of interspecific diversity in E1 and E2 optima – Negative correlation

community 1 2 3
